TRACEABILITY: Stages of the process and Information flow

RESOURCES

- **Systems:**

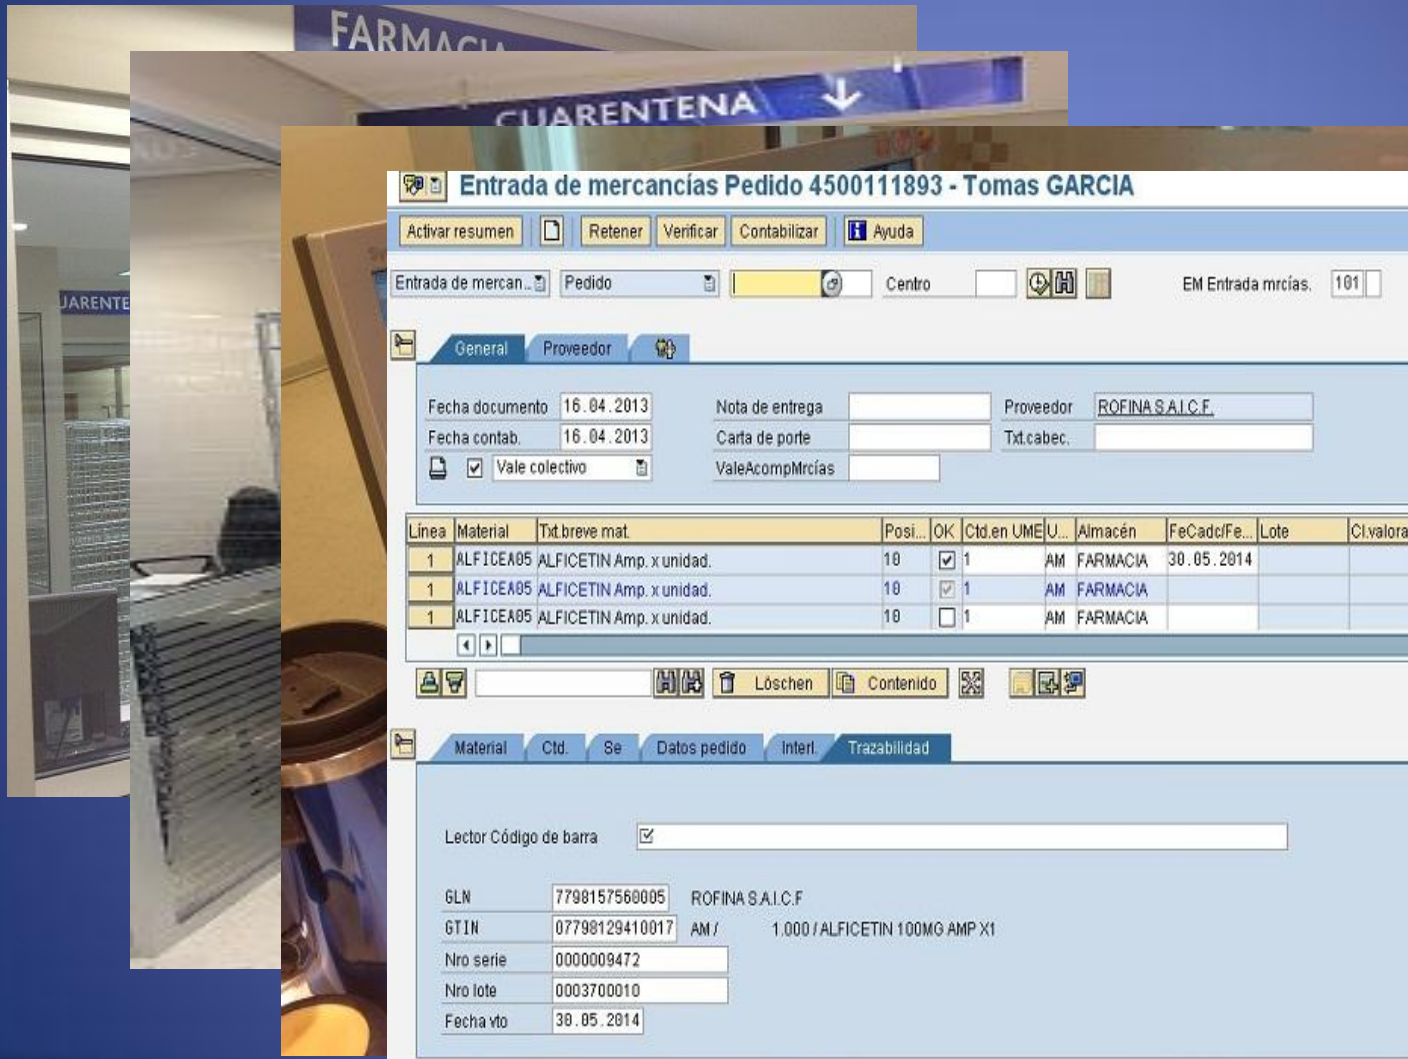

1. Acquisition of traceability software (InfHos).
2. Development and implementation of solutions for internal traceability (IADT).
3. SAP: Tables of GTIN/GLN linked to internal codes and modification of existing interfaces (Consultant).

- **Equipment:** 2D Readers

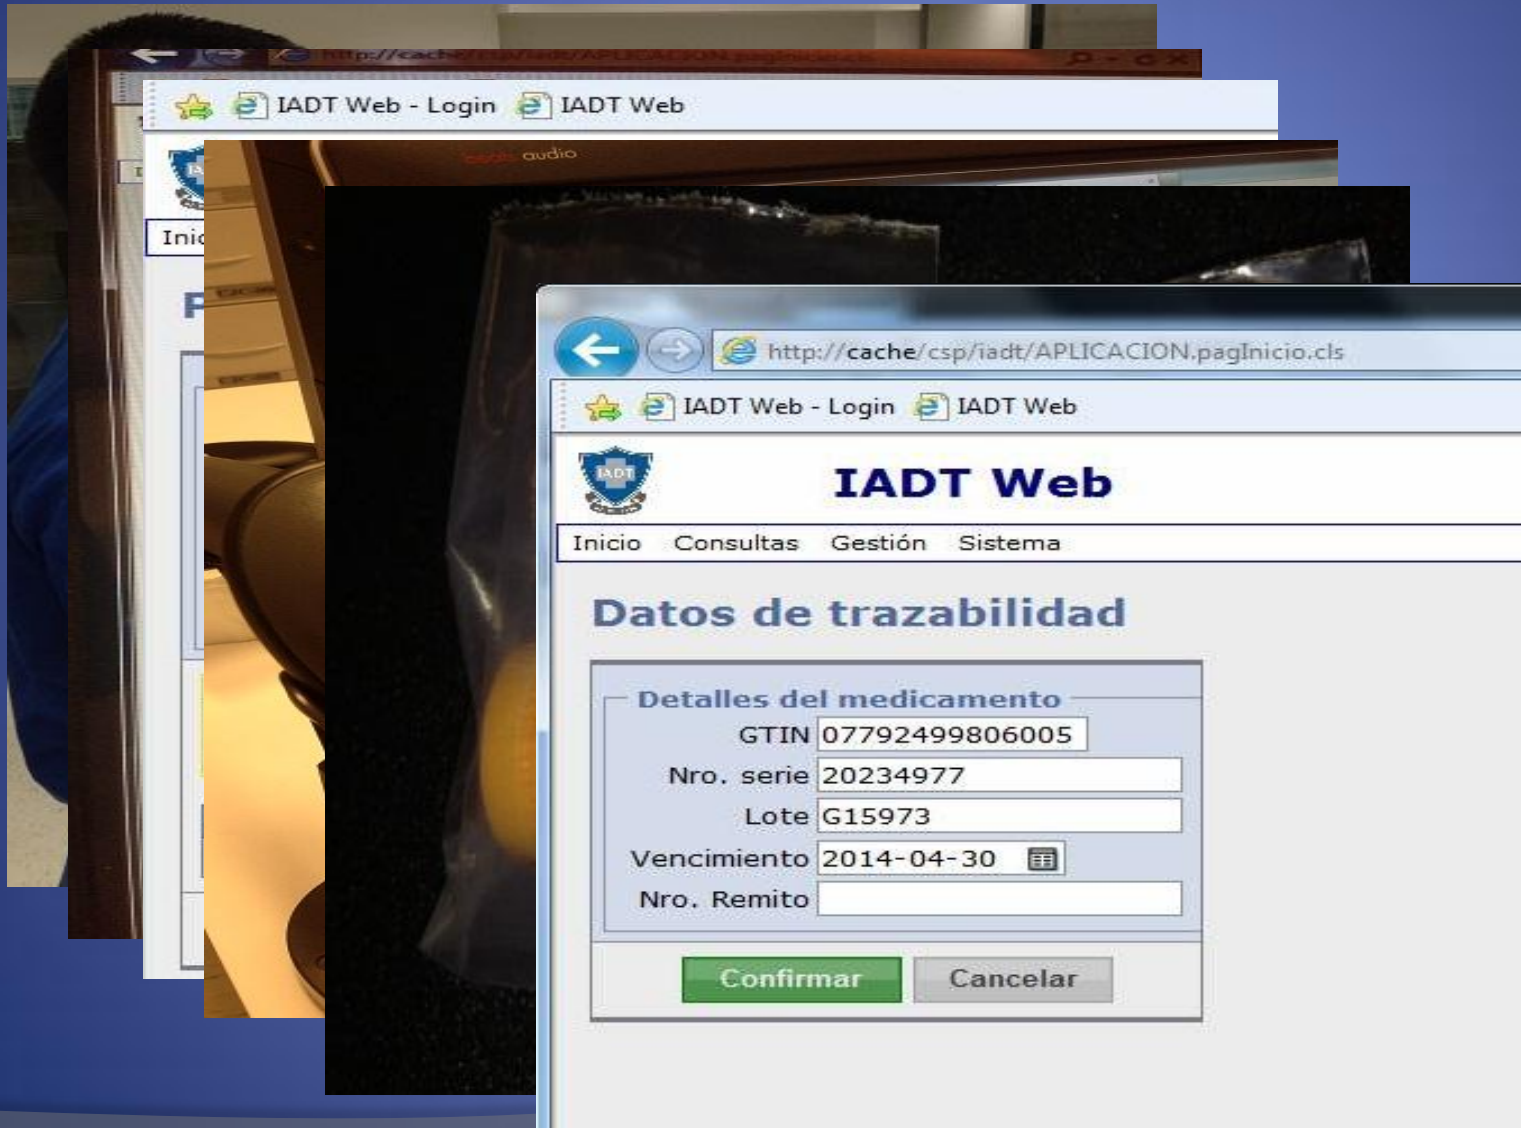

- **Human Resources:** incorporation of personnel for the merchandise reception area (March 2013).

- **Infrastructure:** quarantine area for untraced products.

PHARMACY: Reception of Merchandise

PHARMACY: Prescription Area

The image shows a person in a pharmacy setting looking at a computer monitor. The monitor displays the IADT Web application interface, which is used for prescription management. The interface includes a navigation menu and a form for entering medication details.
