

Call To Action

John Howells
HDMA
Director, Industry Relations
June 6, 2007

Overview

- U.S. Healthcare supply chain is a safe and efficient system for the delivery of medicine to the patient.
- In the interest of patient safety we are always looking to enhance the supply chain.
- Supply chain partners are exploring track & trace technology to increase the safety & security of the supply chain.

Participants

- HDMA
- PhRMA
- NACDS
- GPHA
- Top Executives from member companies
- Associations and companies continue to join

GOALS

- ID and understand track & trace technologies to further advance safety, security, regulatory compliance and efficiencies.
- Assess industry readiness and challenges.
- ID milestones to adopt track & trace as an industry.
- Estimate a realistic date when track & trace technologies will be available and can be implemented as a supply chain.
