

Healthcare Product Data Utility

The Path to Data Quality

GS1 Healthcare Users Group 4-6 June 2006

Kathleen Garvin
Program Manager, DoD/VA Data Synchronization
Defense Supply Center Philadelphia
(kathleen.garvin@dla.mil)
215-737-9092

How We Get Data Now

- **Manufacturer**

- Generates product data to sell and market products

- **GPO & Distributor**

- Changes/creates/manipulates data to meet customer base / regional needs

- **User – Provider**

- Creates internal data item masters/catalogs in order to identify products, request & fill patient needs

Problem is ...

- **No consistent data standards throughout supply chain**
- **Inaccurate & bad data at all levels**
- **Customer pays the price for bad data - \$\$\$\$**

Road to a Solution...

PDU Organizing Committee

DoD & Industry PDU Pilot Phase I

DoD & Industry GDSN Pilot

To Reach End Goal: Industry PDU

PDU Industry Organizing Committee

- ✓ **Organizing Committee established Feb 05**
- ✓ **Outreach, Education, Marketing, Networking – expand participation**
- ✓ **Draft RFI Developed**
- ✓ **Working Groups**

BON SECOURS HEALTH SYSTEM, INC.

Carolinus HealthCare System

DoD Pilot PDU – Phase I

Manufacturers (23)

**Distributors
GPO's &
Data Exchange (5)**

Medical Action Industries Inc. KERMA Medical Products, Inc. WATERJEL Technologies HEMCON Hemorrhage Control Technologies BRAUN SHARING EXPERTISE
Kimberly-Clark tyco Healthcare Johnson & Johnson Health Care Systems Inc. Medegen CardinalHealth
MEDLINE DeRoyal BAIRD Advancing the Delivery of Health Care. CYPRESS Medical Products ARROW International
propper BD Helping all people live healthy lives 3M WelchAllyn SAGE PRODUCTS INC.
NORTH AMERICAN RESCUE PRODUCTS INCORPORATED Baxter Retractable Technologies, Inc.
Owens & Minor CardinalHealth CONSORTA GHX Global Healthcare Exchange PREMIER

- ✓ **Proof of Principle for Industry**
- ✓ **Manufacturer as source of data**

Active Federal Collaboration

Synchronizing the Federal Medical Supply Chain

- **Working Group**
 - Army, Navy, AF, DMLSS, DSCP, VA, JMAR, DMSB, ASD/HA, DLIS, HHS
- **Partnership with FDA on UDI**
- **DoD / VA JIF Data Synchronization partnership**

U.S. Food and Drug Administration

DoD Lessons Learned

- DoD's UPN Initiative 1993
 - Assignment of numbers without a process in place to certify and distribute does not work
- Cleaning and standardizing in-house data is not enough.
 - Very expensive to constantly cleanse data – not the answer
 - Adopt standards
 - Adoption of an industry PDU is the way to achieve quality medical product data for the entire healthcare community
- Synchronizing and accessing data from central utility:
 - Reduces bad data
 - Reduces costs
 - Increases operational efficiencies

Industry PDU...a Better Way

- **Criteria**

- Unique product registry for validated basic information
- Capable of transmitting Healthcare specific attributes
- Governance mechanism to set standards and govern operability
- Global reach and partnership

- **Existing commercial solution GDSN**

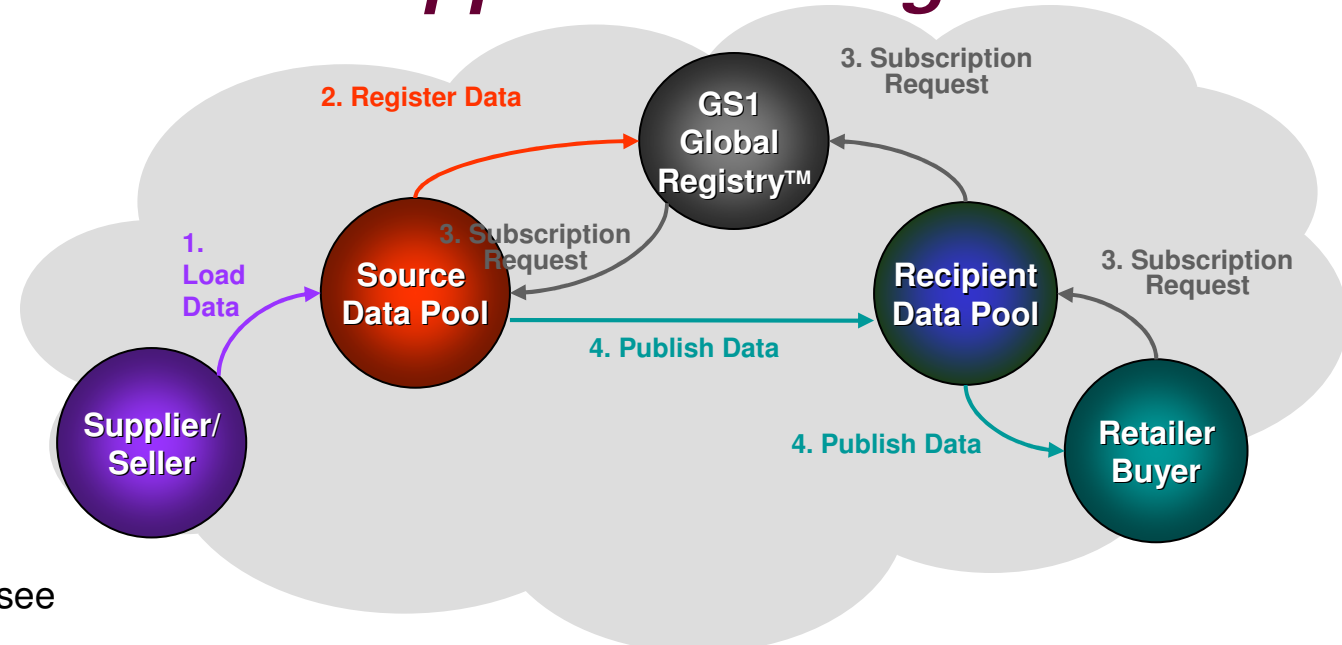

- Eliminates major unknowns for transition to Industry PDU
- Established systems network platform for sharing synchronized data used by major US industries, e.g. Wal-Mart, Lowe's, etc
- Facilitates implementation of RFID and potential use of GLNs
- Many major healthcare mfrs already active participants in GDSN for retail

Data Synchronization: How Does It Work?

The Wal-Mart Approach Using GDSN

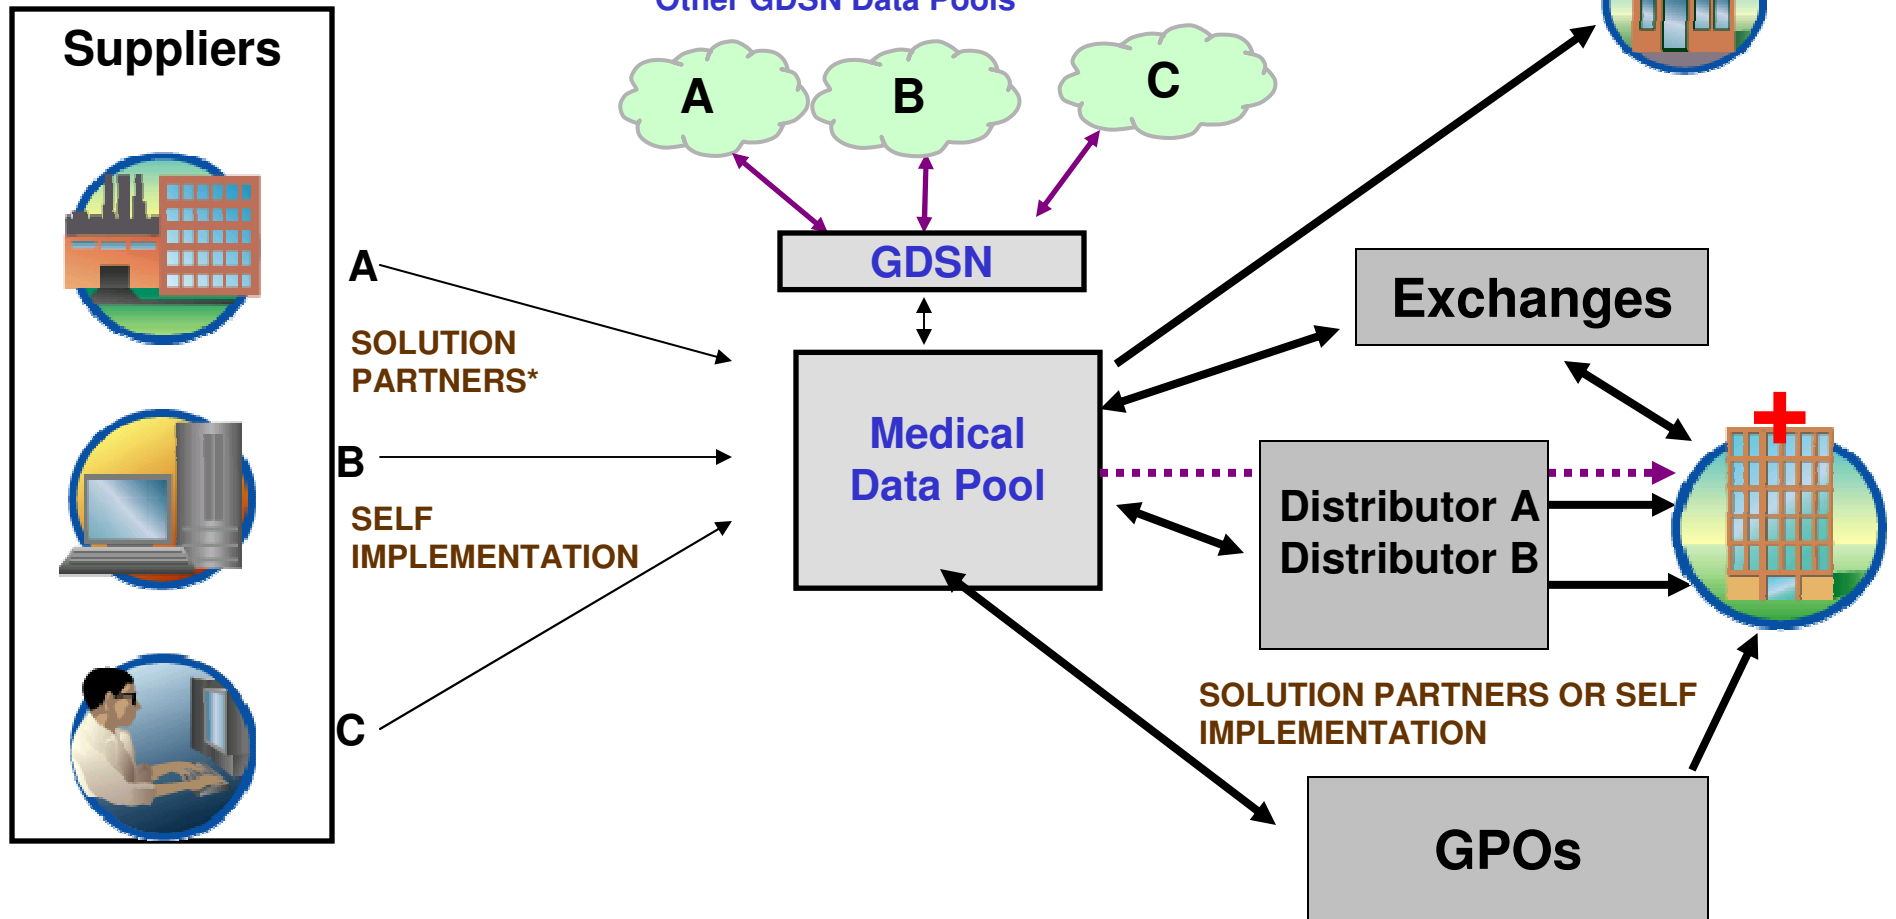

Network Built for Product Data

- **Data Privacy**
 - Suppliers only
 - publish what they
 - want recipients to see
- **Data Quality**
 - Automated product data validations occur at multiple levels within the process
 - Corrections are made only once, then all benefit from that correction
- **Ease of Use**
 - A single product entry can be published to an unlimited number of end users, distributors and retailers
- **Competition**
 - GDSN is unique in allowing competing data pools to work in the network together
- **Worldwide Scope**
 - Data pools around the world can communicate with each other
 - Native languages supported

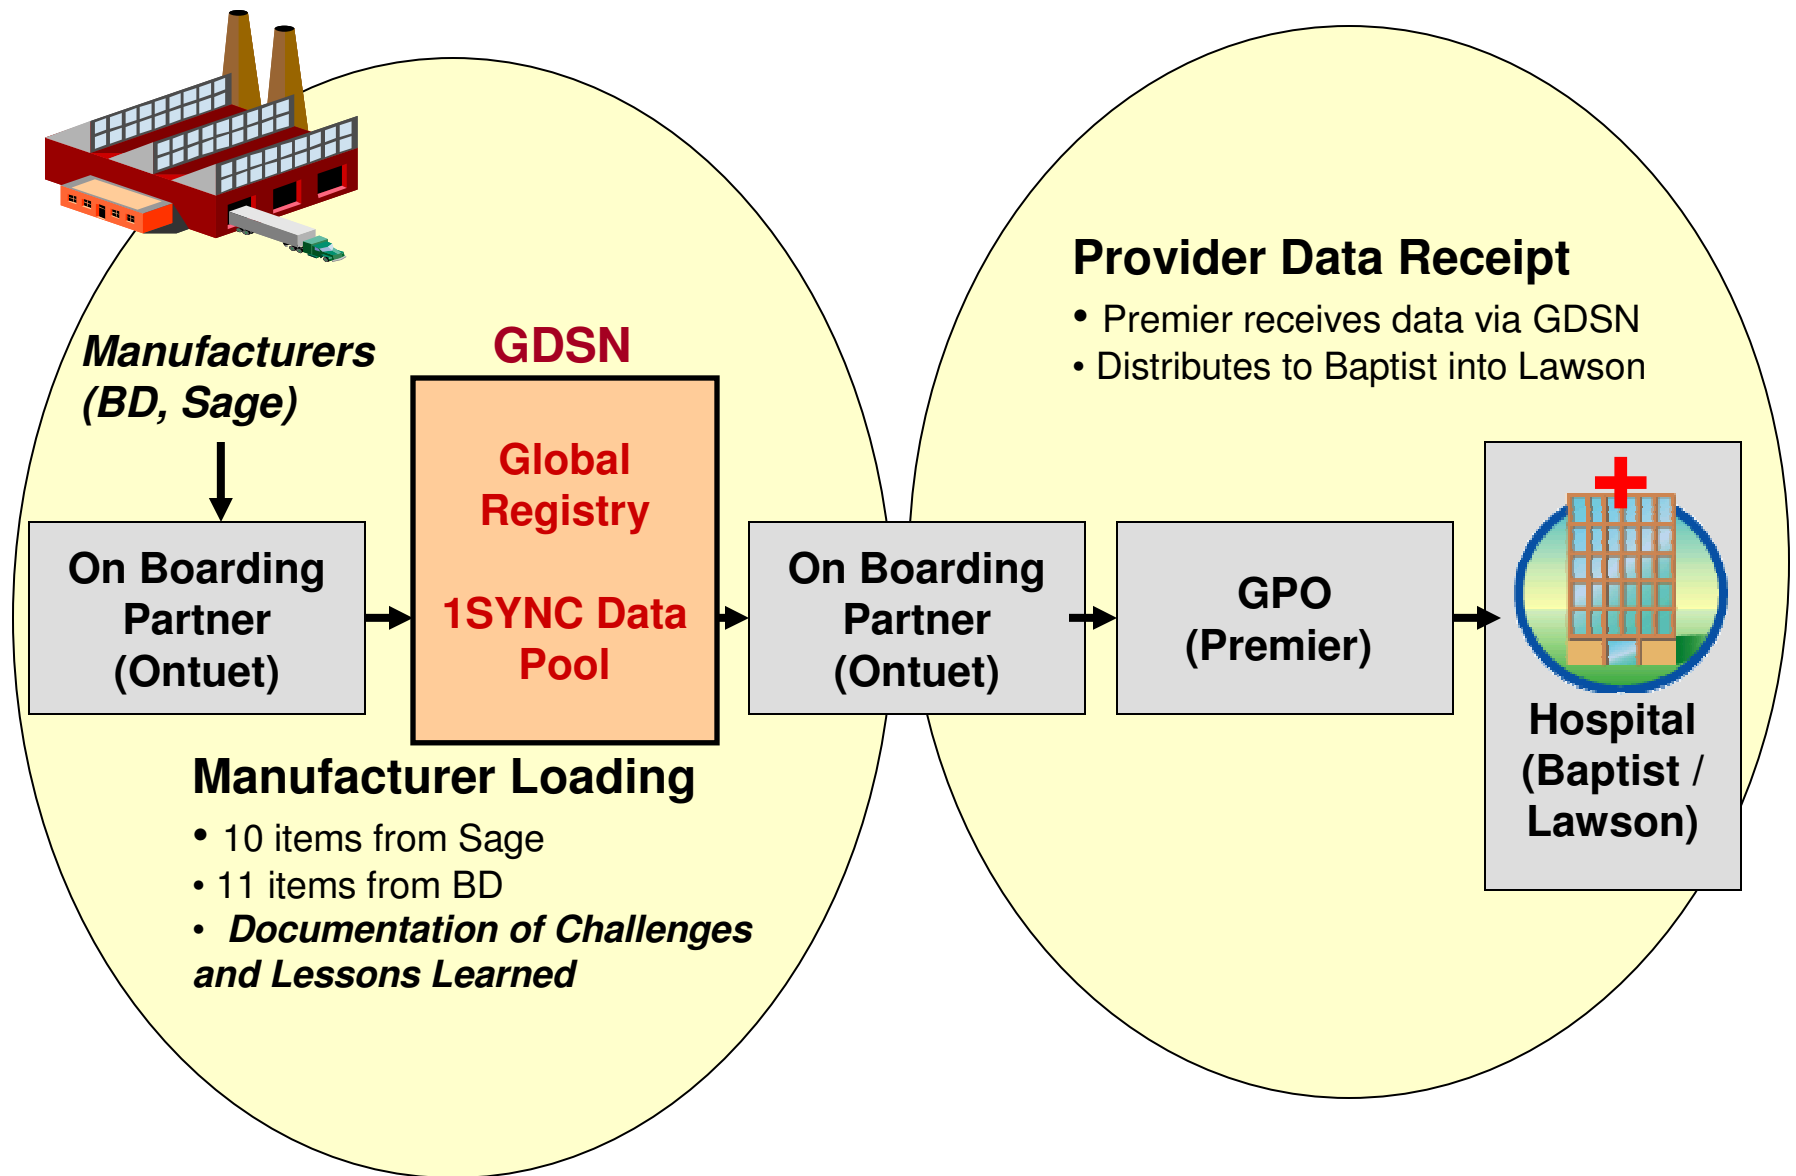

DoD GDSN Pilot Concept

GDSN as potential healthcare PDU solution

Healthcare GDSN Pilot Phase II A Execution & Participants

What We Accomplished in GDSN Pilot Ph II A

- Systematically passed validated manufacturer item to trading partner business systems
- Identified data sources for mandatory GDSN fields in existing systems
- Identified top healthcare data fields desired by participants
- Mapped GDSN fields to existing participants' system fields
- In the process of documenting resource, system, and process requirements to share data throughout supply chain

***Goal: Test the Suitability of GDSN as
a Potential Industry PDU***

What We Learned so far...

Manufacturer:

- Have data, just not in one place – need an internal product data strategy
- Need for an Industry-wide product data strategy
- Global impact on decisions

GPO:

- Can consume GDSN data with minor changes to current system
- Minor enhancements required to deliver GDSN data using existing delivery system
- Well positioned to provide standards based integration approaches beyond current delivery mechanism

Software Provider:

- Internal business systems have many of the fields, technology and processes to get started with data synchronization
- Long term, they will need to be further adapted for new processes driven by the GDSN
- Processes exist for managing GDSN communications outside of ERP

Hospital:

- Can use data for spend analyses
- Project significant savings in reconciliation of GPO and distributor item files

What Do We Need to do Next?

- Grow pilot by increasing participants and scenarios
- Build on Lessons learned from earlier participants (Mfrs, GPOs, IDNs)
- Add Distributor needs/challenges to pilot test
- Collaborate on next best steps

Goal: Test the Suitability of GDSN as a Potential Industry PDU

Healthcare GDSN Pilot Phase II B Potential Participants

Manufacturers
(BD, Sage, & ??)

- Goals:**
- Add manufacturers and/or items
 - Test with additional provider systems
 - Add additional supply chain partners

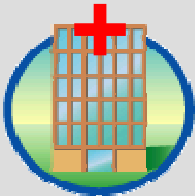

↓
On Boarding Partner
(Ontuet, etc)

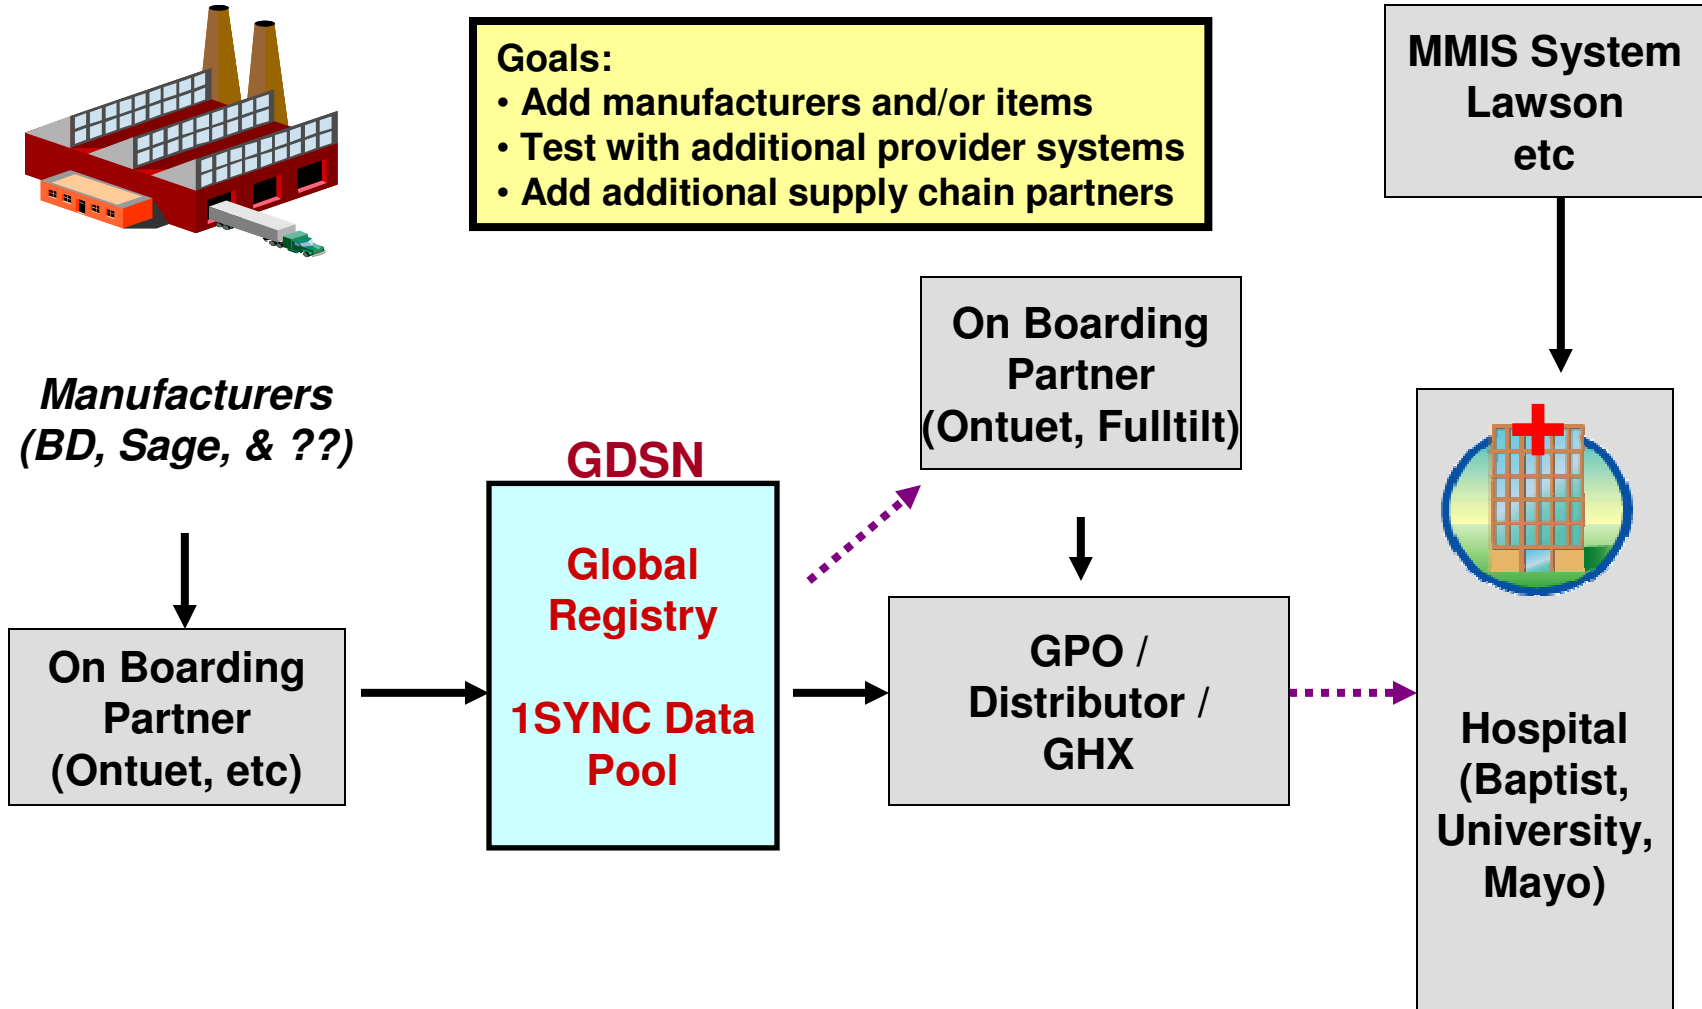

GDSN
Global Registry
1SYNC Data Pool

On Boarding Partner
(Ontuet, Fulltilt)

↓
GPO / Distributor / GHX

MMIS System
Lawson
etc

↓

Hospital
(Baptist, University, Mayo)

Where Are We Going?

- **Continue building Proof of Principle & Industry Collaboration**
 - *Build upon GDSN test pilot participation as PDU venue*
 - **Explore Industry solutions with PDU Organizing Committee**
 - **Work with standards organizations (CHeS, HSCSC, GS1 HUG) to promote global standards**

End Point = Industry Solution / PDU
