Vertical Integration in the Health Value Chain

The San Raffaele Foundation Corporate Overview

Facts and Figures, 2002

- 1,350 beds in Milano
- 3,400 employees
- 53,000 patients hospitalized
- Over 6 millions out-patient services
- Over 6 million laboratory tests
- 55,000 patients to emergency
- 22,000 surgeries performed
- 12,4% of the Italian scientific productivity

Worldwide Activities

- Poland, Brazil, Israel, India, China, etc.

© Alberto Sanna, Scientific Institute H San Raffaele @ GS1 - HUG meeting June 13, 2006 Minneapolis USA

Vertical Integration in the Health Value Chain

Track & Trace Added Value Business Needs

- **Patient Safety**
- Supply Chain Integrity
 - ✓ Counterfeit, Diversion (Gray Market, Internet)
 - ✓ Shelf Life Management, Recalls, Accountability
 - ✓ Environmental Conditions, e.g. Cold Chain
- Supply Chain Efficiency
 - ✓ Order and Inventory Management
- Fraud Prevention
 - ✓ State Health Insurance Reimbursement
- Counterterrorism, Bioterrorism

Vertical Integration in the Health Value Chain

Key action II

New methods and work for electronic commerce
Schedule: start June 1st, 2000; duration 30 months
Budget: 4,2 million EURO

Scientific Institute H San Raffaele (I)
 European Community Joint Research Center JRC (EU)
 Politecnico di Milano (I)
 Health Projects Favero (E)

Atos Origin Integration (F)
 AstraZeneca (I)
 Glaxo-SmithKline (I)
 Karolinska Institute-CHT (S)
 Gdansk University of Technology (PL)

Vertical Integration in the Health Value Chain

The DRIVE System - FP5 IST 12040 Proactive Patient Safety and System Efficiency

HOSPITAL

- Therapy Prescription
- Anamnesis/Diagnosis
- Pharmacy Activity
- Therapy Administration
- Therapy Preparation
- Therapy Monitoring
- CLINICAL PROCESS
- INBOUND LOGISTICS: Shipment Receiving, Pharmacy warehouse, Ward warehouse
- OUTBOUND LOGISTICS: Contract/order management, Drug Distribution
- Patient Admission
- Patient discharge

SUPPLIER

- Contract/order management
- Drug Distribution
- Drug Registration
- PUBLIC HEALTH AUTHORITY
- Drug Surveillance

Vertical Integration in the Health Value Chain

The DRIVE Pilot

Pilot results: Supply Chain, Trust & Security

Digital Wristband - 91,3 % patients approval.
Significant improvement in Patient Safety

Trust Infrastructure (digital signature and RBAC)
Significant improvements in:

- Patient Privacy,
- Healthcare Operator Accountability,
- Business to Business Confidentiality.

Digital Label - Complete **Real Time Traceability @ Item Level** of drug life-cycle (production, logistics and clinical phases by means of unique serial number, lot, exp-date, etc.) Significant improv. in fraud prevention.

Logistics - Drug supply chain efficiency improvement (-30 % operative costs)

© Alberto Sanna, Scientific Institute H San Raffaele @ GS1 - HUG meeting June 13, 2006 Minneapolis USA

Vertical Integration in the Health Value Chain

The DRIVE Labeling Strategy

Redundant and Distributed Databases: Self-Informative Products

Field Name
Label Type
Product Code
Product Name
Manufacturer Name
Unitary Dosage Unit
Unitary Dosage
Number Of Doses
Preservation Rule
Expiration Date
Lot Code
Serial Number

Vertical Integration in the Health Value Chain

Labels for end-to-end Value Chain Integration

Comparing "Line of sight" vs "Cluster" readings in the process

1D Code
(2/5 Interl.)

1D + 2D Composite
(Mesaztec)

2D Code
(Aztec)

TAG RF ID
(13.56 MHz)

Preliminary results* of the DRIVE Task Group on RFID:

- full traceability of single items through the whole of the supply chain (supplier-distributor-hospital-patient) is the enabler of VALUE-ADDED SERVICES (Patient Safety & Products Logistics), with short term ROI;
- system costs with optical reading are 4 times higher than costs with RFID tags.

* The estimate has been performed comparing end-to-end processes of 4 Typical products

Tunnel for Simultaneous Item Reading

Tunnel reading frequency	13.56 MHz	
Tunnel size (approximately):	Height	1650 mm
	Width	1060 mm
	Length	980 mm
Max Package size (approximately)	H 630 mm x W 600 mm	
Voltage	230V / 400V	
Middleware for RFid integration and control	included	

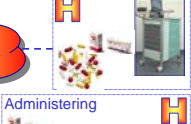

Tunnel for simultaneous reading of RFID tagged Packages, randomly distributed in shipping boxes.

- Vertical Integration in the Health Value Chain
- Track&Trace-based Services**
Main Issues
- *Supply Chain Efficiency*
 ✓ *Sustainable Data Capture of Cluster of Products*
 - *Standardization and Coding at the Item Level*
 ✓ *Global, European, National, Regional, Provider level?*
 ✓ *Blister Level? Medical Devices, Reagents, Implantable Devices? Packaging Requirements?*
 - *Safety critical application*
 ✓ *Redundancy for Critical Data Availability at the Point of Care (Decision)*
 - *Protection of Sensitive Data*
 ✓ *Patient Privacy, Business Confidentiality*
 ✓ *Health Authorities and Regulatory Bodies*
- © Alberto Sanna, Scientific Institute H San Raffaele @ GS1 - HUG meeting June 13, 2006 Minneapolis USA
