Standards Implementation/ Regulatory Affairs

Refer to EPCglobal

Standards Implementation/ Regulatory Affairs

High priorities

Standards Implementation/ Regulatory Affairs

Product	Pharmaceuticals				Cold Chain	IVD
	OTC	retail Rx	hospital Rx	controlled substance		
Application						
E.g. authenticate						
dispense						
procurement						
Identification Choice						
E.g. GTIN						
LOT / Batch						
SN						
Expiry						
Marking Choice						
E.g. Label						
Direct Part						
On line						
Carrier Choice						
E.g. Linear bar code						
Datamatrix						
RFID						
EDI, XML						
GDSN, peer to peer						
Carrier Specs						
E.g. bar code placement						
RFID frequency						
GDSN validation rules						

Standards Implementation/ Regulatory Affairs

Product	Medical Devices						
	Active Implant	Implant	Electronic Instrument	Sterile Single Use	Non-sterile Single Use	Sterile Reuse	Non sterile Reuse
Application							
E.g. authenticate							
dispense							
procurement							
Identification Choice							
E.g. GTIN							
LOT / Batch							
SN							
Expiry							
Marking Choice							
E.g. Label							
Direct Part							
On line							
Carrier Choice							
E.g. Linear bar code							
Datamatrix							
RFID							
EDI, XML							
GDSN, peer to peer							
Carrier Specs							
E.g. bar code placement							
RFID frequency							
GDSN validation rules							

The previous matrix defines data element

Next, we need to define item master

- Global data dictionary
- GLN usage
- Global product classification
- GDSN registry

Finally, define eCom transactions and complex processes
(lower priority)

Suggested Process

1. Prioritize
2. Organize by expertise - align with GTIN allocation and surgical instrument marking
3. Align terms and assumptions
4. Gather requirements E.g. France and AU e-catalogues
5. Develop
6. Review and revise
7. Communicate
